FX*airguns* MADE IN SWEDEN

AIR TO A GREAT TRADITION

I've been shooting since I was four years old. I'm 50 now, and I can shoot pretty much any type of rifle, shotgun, or pistol I want to, in a wide variety of situations. While I enjoy all types of shooting, my true passion is for airguns; it's where I began my shooting career and it's provided me with everything I need throughout my shooting life.

As I grew and improved my range of shooting skills, my airguns grew with me and I became ever more fascinated by how they worked, how they could be improved and how I could improve the way I used them. My shooting became a passion, and airguns were the focus of that passion.

From those early times, all the way to the present, I've shared my sport with some remarkable people, who also shared my passion. Inventors, engineers, world-class marksmen, hunters of all descriptions and a whole range of experts and enthusiasts have inspired me and increased my enjoyment of shooting. Among these remarkable people was a young man from Sweden, who was introduced to me by John Ford, the founder of Sportsmatch UK. As I exchanged pleasantries with Fredrik Axelsson that day, I couldn't have known that I was shaking hands with someone who would go on to change the face of modern airgunning.

After our first meeting, Fredrik and I went our separate ways, but I would receive regular updates from John Ford about the discoveries made by Fredrik and how much the young man's industry and inventiveness had not only impressed John, but had inspired new directions in his own developments. John Ford once told me that he considered Fredrik Axelsson to be the most talented airgun engineer he'd ever met. Praise indeed, from a man respected throughout the airgun industry, not just for his achievements, but for his honesty and integrity. John Ford spotted something special in Fredrik Axelsson and that faith was well founded. The potential of Fredrik's early years has now come to full fruition via FX Airguns.

Like John Ford, Fredrik Axelsson and every airgun hunting expert I've had the pleasure to meet throughout my years of shooting, I use air rifles because I appreciate their quiet, efficient, precision. Modern air rifles, and especially those produced by companies with the worldwide reputation of FX Airguns, are capable of total accuracy, extraordinary consistency, and a variety of power outputs to suit an even wider variety of hunting and pest-control situations. The modern air rifle is a precision hunting machine that will translate

the skills of its owner into success in the field. But there's more to hunting with airguns than their pure efficiency.

Air-powered hunting rifles from FX Airguns can be used where no other rifle would be suitable. The ability to adjust the power of these rifles renders them safe, silent and extremely efficient when clearing rats and pigeons from buildings and other short-range situations, after which the rifles can be instantly adjusted to cope with small game at greater ranges. Few, if any, hunting rifles offer the versatility of an FX Airguns sporter.

These virtually recoilless rifles can easily place their shots inside a 20 mm circle at 50 metres range, and the auto-reload capability of an FX air rifle can have the next shot ready in less than a second, with the semi-automatic models even faster. Fit a silencer to the ready-threaded barrel and you instantly add stealth to your hunting armoury. The modern air rifle opens a vast new world of sporting potential.

On several occasions, I have personally taken over 100 rabbits in a single night, using an FX Airguns hunting rifle. I have also used the very same rifles to clear infestations of feral pigeon from premises where only the precision culling capabilities of my FX rifles made the job viable. With near-silent shooting at my disposal, and the ability to take shot after shot without the disturbance of loud muzzle-blasts, my air rifles equip me like no other piece of shooting hardware possibly could. Air-power is one of the most practical and versatile systems of them all, and FX Airguns takes that system to a new level.

Having enjoyed the use of FX Airguns over the years, I wanted to find out more about them and to see how they were made. In June of 2006 I visited the FX Airguns factory and saw for myself what Fredrik Axelsson had built from his

ideas and inventions. No shooting man could fail to be impressed by the degree of research, pre-production testing and quality control involved in the production of FX airguns. Like the airguns themselves, the emphasis is on quiet precision and performance to the highest standards.

For me, it was gratifying to see the drive and passion that so impressed those that met Fredrik Axelsson when he began his career, had not only been maintained, but increased. Experience and the encouragement of success have added even greater direction to the quest for ultimate performance, and, at FX Airguns, innovation is now part of the process. This is a company that makes fine airguns, and then strives to make them finer still. There is a genuine commitment to excellence, here, and it's certainly reflected in the products.

Since meeting up with Fredrik Axelsson and spending time studying his methods and products, I now realise that the key to the success of FX Airguns is an extremely simple one. Fredrik is passionate about what he does and the airguns his company produces reflect that passion. Only the very best is good enough for Fredrik Axelsson, and he applies that standard to the needs of his customers. Therefore, whilst the products may be hi-tech and clinically efficient, the philosophy behind them is refreshingly traditional. I think that's just about the perfect combination, really.

There has never been a better time to own a high quality airgun. Thanks to pioneering inventors like Fredrik Axelsson, airguns and their related products have progressed as never before. These are genuine sporting arms, and fully capable of true hunting performance. I've enjoyed a lifetime of pleasure, challenge and satisfaction from my airguns and I know that FX Airguns can provide the same for you.

Happy airgunning

Terry Doe

Terry Doe is a former European, U.S. and U.K. Field Target shooting champion, a prolific author on airgun-related subjects and a consultant for many of the U.K.'s airgun companies.

FXtyphoon

A lightweight single shot rifle with few moving parts that settles for many years of trouble free shooting. Available in lightweight synthetic or walnut that fits both left and right hand shooters. Bolt action cocking with safety mode. Recoil free.

Cocking system	Bolt action	
Magazine type	Single shot, no magazine	
Stock	Synthetic:	Adjustable rubber recoil-pad
		Ambidextrous (equal on both sides)
	Walnut:	Adjustable recoil pad
		Ambidextrous (equal on both sides)
	Field Target:	Fully adjustable rubber recoil-pad (height/length/sideways)
		Adjustable cheek piece (height/sideways)
		Ambidextrous (equal on both sides)
Calibre	6,35 (.25) - 5,5 (.22) - 4,5 (.177)	

Barrel	Smooth-twist • Length 500 mm (6,35 - 600 mm)
Pressure gauge	No
Trigger	Adjustable match trigger (400 - 700 g)

Hole for 3 extra magazines

Cocking system: straight pull with auto return

Velocity adjustable in three steps

FXrevolution

The Revolution takes airguns to the next level with its fast-fire semi automatic system. Wasted air is used to cycle the bolt and index the magazine and along with a new 12-shot magazine it allows more shots while reducing the time between shots to zero! Due to the efficiency of the semi-automatic system it's extremely quiet without the use of any additional components.

The manual bolt lever enables the rifle to be safely loaded and refilled without any risk of misfire. Along the right side of the Revolution is a cleverly designed safety that prevents the semi-automatic rifle from firing. The Revolution is sure to supply rapid fire enjoyment along with single shot precision, and it stands alone with nothing in its class to compare with. Ambidextrous synthetic stock with adjustable bottle cover/check piece (length/angle). Recoil free.

Removable air cylinder, capacity 500 cc

Delivered in a compact hard-case

FXroyale

200

The Royale 200 gets its name like all of the Royale series from the capacity of the air cylinder. The rifle shares the same high tech breech block and side lever cocking system as the Royale 400. The 200 incorporates the latest in valve technology giving the shooter many accurate shots per fill out of the super match grade barrel. The stock is an ambidextrous synthetic unit that allows comfort for both the left and right hand shooter. Fully adjustable trigger system and whisper shroud for extremely low report is standard on the 200 as well as an 11 mm scope rail. The rifle can be used as a single shot for best accuracy or as a repeater with the included rotary magazine for fast follow up shots when required. A fine choice for hunting and long-range target use. Comes as standard with the patented power adjuster with repeatable power settings. Recoil free.

FXroyale

400

Without a doubt one of FX Flagship! Fredrik Axelsson spent two years in developing and testing the Royale breech block and valve system before it was put into production. Incorporated into the new breech block is a super smooth and effortless side lever. Cocking system and spring tensioned magazine. Adjustable match-grade trigger for crisp, precise release of the shot and a 3-step patented power adjuster that allows for super-fast selection of the required power level. The power adjuster will also repeat itself with absolute precision. The 400 cc air supply provides many super accurate shots from the Smooth-twist barrel. The Royale 400 is a light-weight super gun. Quiet in report with the included suppression system. A regulator can be added for an additional charge to give more consistent shots per fill but is not required. Recoil free.

Removable air cylinder, capacity 400 cc

FXroyale

500

The Royale 500 sports all of the features of the 400 series rifle with a few exceptions. The 500 is a .25 caliber with a longer smooth twist match grade barrel as well as a larger 500 cc air cylinder to provide maximum performance. The 500 comes as standard with the patented power adjuster with repeatable power settings. Available with a syntetic or luxurious walnut stock the 500 is much lighter than it appears and can be carried in the field for extended periods of time. Super high power and recoil free, the Royale 500 is the best for larger pest and long range shooting. Regulator is also available as an upgrade.

FXindependence

Completely independent from an external power supply but with all the benefits and advantages of all available PCP systems on the market. Choose any combination of shots/pumps to match the need of the situation. Large pressure gauge for precise control over the working pressure to ensure ultimate consistency. All PCP airguns have what is called a “sweet spot” where the accuracy is at best. The Independence can be kept at this level with ease.

FXranchero

The FX Ranchero is the premier, repeating pre-charged pistol on the market. The latest model sports a new synthetic stock with soft touch panels that provide the ultimate in comfort for all weather conditions. The action has been moved rearward in the stock for better balance and control, and a new side lever handle gives better grip for ease of use. The patented 3-step power adjuster has clear markings for low, medium and high settings and a scope rail is standard.

The match grade barrel and adjustable trigger unit help to give this pistol the accuracy and power it is famous for. Two eight shot magazines are included as well as a hard plastic carrying case. The Ranchero is the leader in high power recoil free pistol performance.

FX*biathlon*

The FX Biathlon rifle is a true side lever system in the spirit of the Olympic competition rimfire guns. The fast side lever cocking action is how the rifle gets its name along with the fully adjustable synthetic stock. The rifle can be used as a multi-shot repeater or single shot for match use. Perfect for training or competition use, the Biathlon includes such features as a pressure gauge, scope rail, front compensator and diopter sight option. Super accurate match barrel and adjustable trigger are part of the standard list. The Biathlon is a unique rifle and can be utilized for hunting and pest control when needed or for just shooting fun. Recoil free.

FX*verminator MkII*

The Verminator Mk2 is the premier, small, takedown style rifle that is packed with high quality features. The award winning Royale breech block is the foundation for this high performance tack driver. With a 400 cc air cylinder and super efficient valve system the Verminator Mk2 does not disappoint. It boasts a large shot-count, three-step power adjuster, match grade barrel and an adjustable trigger. The synthetic stock is both purpose-built and adjustable for length of pull and face position. The multi-shot magazine combined with a super smooth side lever cocking action gives fast follow up shots. The barrel is fully shrouded for super quiet report and choked for match accuracy. The rifle comes in a fitted case with room for additional accessories. Recoil free.

FX*gladiator MkII*

The Gladiator Mk2 sports all of the features as the Verminator Mk2 with the addition of a front air cylinder to give huge shot counts from all three power settings. Big on power and accuracy the Mk2 is a great choice for a day of shooting in the field. A pressure gauge and multi-shot magazine are standard equipment on this super quiet air rifle. The match grade trigger unit ensures target grade performance and the efficient valve system gives very tight shot to shot velocities. A regulator can be added that will give even more shots per fill. Like all of the FX range the Gladiator is recoil free.

FX*elite*

The FX Elite series use the Royale breech block with a single shot, direct barrel loading system. To ensure top level match accuracy the pellet must not be damaged in the loading process. The Elite loading platform removes this possibility by allowing the shooter to insert pellet directly into the barrel. The massive bolt seals the air on the breech face with the airflow being unaffected, giving the highest level of accuracy possible in a field target or benchrest rifle. The barrel is very easy to change allowing for multi-caliber options from one gun. A regulator is a recommended option but is not required. The Elite series is available on the Royale 200, 400, 500 and Independence actions.

FX *verminator* MkII

EXTREME

The FX Verminator Extreme is the ultimate in compact airgun versatility. We have taken into consideration all possible airgun applications and have included the necessary kit to handle any scenario with the Extreme. Upon opening the included hard case one will find the Verminator Mk2 rifle with FX scope mounted with quick change mounts.

Further investigation will reveal a second full length barrel for high power applications as well as a shroud extension that can be used on both short and long barrels for super quiet report. Switching from short to long barrels requires no tools and only ten seconds to complete. The shooter can switch from a short carbine or full length rifle in less time than it takes to load the 12 shot magazine. Nestled nicely in the custom laser cut foam packing is a bipod and its mount, a torch and its mount with the added convenience of both able to be mounted on the rifle.

We have also included a special barrel that will shoot arrows for added fun or small to medium size game. Hidden in a special compartment included in the case are target and hunting arrows with a special arrow for line shooting or spear fishing. Leaving nothing to chance there is also a fishing reel included for retrieval with a mount to fit the rifle. The FX Verminator Extreme is the last name in extreme airgun performance.
